D. Is Sorted?

time limit per test: 1 second

memory limit per test: 256 megabytes

Forbidden Keywords for the Quiz: `sort`, `open`, `file`, `creat`(, `fstream`, `thread`, `process`, `system`(, `exec`(

You are given an array of N integers. Determine whether the given array is in non-decreasing order.

An array is said to be in non-decreasing order if, for every valid index i such that $1 \leq i < N$ (1-based indexing), the condition $A[i] \leq A[i + 1]$ holds true.

Example: $[1, 2, 4, 5]$, $[1, 2, 2, 4, 4, 5]$ are in the non-decreasing order because every element is less than or equal to the one after it.

Input

The first line contains a single integer T ($1 \leq T \leq 100$) — the number of test cases. Each testcase contains two lines.

In each test case, the first line contains a single integer N ($1 \leq N \leq 10^4$) — the number of elements in the array. The second line contains N integers separated by spaces $a_1, a_2, a_3 \dots a_n$ ($1 \leq a_i \leq 10^6$) — the elements of the array.

Output

For each test case, print **YES** if the array is in non-decreasing order. Otherwise, print **NO**.

Example

input	Copy
<pre>3 4 1 2 3 3 4 1 5 2 6 1 5</pre>	
output	Copy
<pre>YES NO YES</pre>
