## H. 220 Trees Reassessed

time limit per test: 1 second

memory limit per test: 256 megabytes

**Forbidden Keywords for the Quiz:** `open`, `file`, `creat`, `fstream`, `thread`, `process`, `system`, `exec`

There is a Binary Tree with  $N$  nodes. You are given the in-order and post-order traversals of the tree. Your task is to determine the pre-order traversal of the tree.

### Input

The first line contains an integer  $N$  ( $1 \leq N \leq 1000$ ) — the number of nodes in the binary tree.

In the next line, there will be  $N$  distinct integers  $a_1, a_2, a_3 \dots a_n$  ( $1 \leq a_i \leq N$ ) separated by spaces — representing the in-order traversal of the tree.

The following line, there will be  $N$  distinct integers  $b_1, b_2, b_3 \dots b_n$  ( $1 \leq b_i \leq N$ ) separated by spaces — representing the post-order traversal of the tree.

### Output

Print  $N$  space-separated integers representing the pre-order traversal of the binary tree.

### Examples

| input                                              | Copy |
|----------------------------------------------------|------|
| 5<br>1 2 3 4 5<br>1 4 5 3 2                        |      |
| output                                             | Copy |
| 2 1 3 5 4                                          |      |
| input                                              | Copy |
| 10<br>1 2 3 4 5 6 7 8 9 10<br>2 1 3 5 6 7 4 10 9 8 |      |
| output                                             | Copy |
| 8 4 3 1 2 7 6 5 9 10                               |      |
